SCYLLA

Intrusion Detection & Perimeter Protection

Scylla AI-powered software is trained to identify humans and vehicles in restricted areas, impressively minimizing false alarms by up to 99.95%.

Scylla Physical Threat Detection Technology Is Trusted By

DAIMLER

Intrusion Detection & Perimeter Protection

Intrusion Detection and Perimeter Protection System can be seamlessly integrated with most video management systems and cameras. It can effectively filter out up to 99.95% of false alarms, thus minimizing noise fatigue, unnecessary panic and expenses.

Scylla Intrusion Detection and Perimeter Protection System is the high-precision AI surveillance technology that perfectly fits businesses that need to monitor a large number of cameras and areas with heavy footfall.

Supported activities:

- Detecting humans and vehicles in restricted areas
- False alarm filtering for motion detection cameras
- Loitering
- Parking area violation detection for vehicles and two wheelers
- Dwell time tracking
- Heatmaps

What makes Scylla AI-powered solution stand out:

- ✓ Scylla can utilize facial recognition technology to identify the intruder
- ✓ Includes social distance monitoring
- ✓ Real-time people counting feature
- ✓ Proven accuracy
- ✓ Configurable zones for counting density
- ✓ AI and machine learning methodologies work autonomously 24/7 and self-improve

Scylla Technology

Scylla is a leading developer and provider of AI-powered physical security technology. We augment your existing security infrastructure with next-gen AI solutions to minimize costs, avoid human-factor errors and provide new tools to boost security and operational effectiveness.

Intrusion Detection & Perimeter Protection

Scylla AI-powered software is trained to identify humans and vehicles in restricted areas, impressively minimizing false alarms by up to 99.95%.

Behavior Recognition & Anomaly Detection

Scylla behavior recognition system allows security professionals to detect and identify a wide range of anomalous events and environments in real-time.

Thermal Screening

Scylla thermal scanning technology effectively detects elevated skin temperature in high-traffic areas through non-invasive target screenings.

Object Detection

Scylla utilizes your existing security infrastructure and transforms it into a proactive security system detecting and identifying firearms, suspicious objects and protective personal equipment.

Drone Security

Scylla AI technology effectively works on drone cameras with non-static environments and backgrounds keeping a watchful eye on your valued assets and operations.

**Scylla makes the camera
surveillance environment real-time
proactive instead of reactive.**
